Rise of Intelligent Machines:

How Robotics & AI Are Transforming Work, Business

Eduardo Munera, PhD
CTO & Founder

Belize City
30/04/2026

Hotels worldwide are under pressure to manage rising costs, staff shortages, and inconsistent service across multiple locations.

Manual processes, siloed systems, and staffing gaps are eroding profitability across hospitality operations.

High Labor & Operational Costs

Labor, utilities, and maintenance **consume up to 50%** of hotel revenue, leaving razor-thin margins.

Fragmented Systems, Fragmented Data

Hotels rely on a patchwork of disconnected automation tools — leading to **inefficiencies, poor visibility, and higher costs.**

Back-of-House Bottlenecks & Inconsistent Service

56% of hotels face staffing shortages that disrupt room turnover and guest satisfaction across sites.

01

UNIFY AND
AUTOMATE

Bring **all smart systems under one platform** — from energy control to housekeeping and room service.

02

STREAMLINED BACK-OF-
HOUSE

Automate service tasks, **track KPIs, and allocate resources** efficiently — reducing manual effort and delays.

03

LOWER COSTS, SCALE
EFFICIENTLY

Data-driven decisions for continuous improvement, reducing waste and maximizing productivity.

ACTIONABLE IOT INSIGHTS HELPS TO
BOOST EFFICIENCY & CUT COST UP TO

45%

Deliverance's centralized command platform connects IoT, robotics, and AI analytics. It's not just software — it's peace of mind for every hotel manager.

Know Exactly
Where You
Stand

Give Your Staff
Superpowers

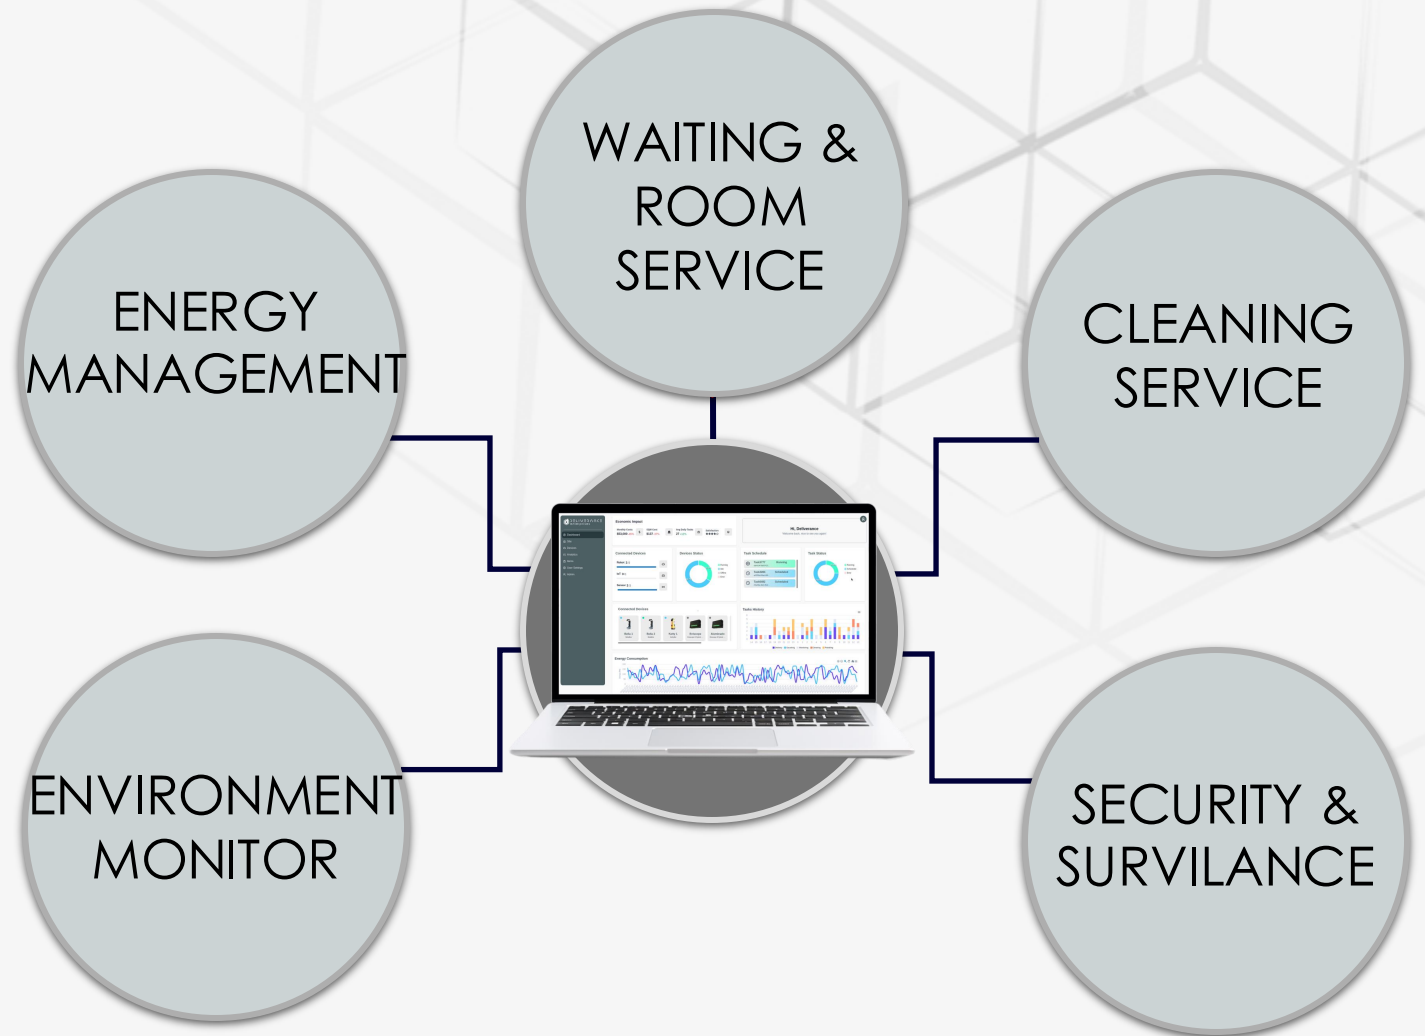

Insights That
Actually Do
Something

Fast Setup,
Faster Payback

The implementation of an **AI smart hotel** includes a set of components that encompass the automation of **building** and **services** at once.

Real-time environment information for consistent guest experience:

- Temperature
- Humidity
- Light intensity
- Air Quality
- Occupancy

Real-time energy consumption down to asset level:

- Where & when are you spending.
- Smart switch according to complex business logic.
- Extend the life of critical assets as compressors.

A robot at your service in every area of the hotel:

- Restaurant waiters.
- Catering events.
- Room service delivery.
- Advertising and publicity.
- Integrated POS.

A spotless hotel as never seen before:

- Multifunction robots: scrubbing, vacuuming, sweeping, mopping.
- Intelligent cleaning routines.
- Automatic water refill and drainage.

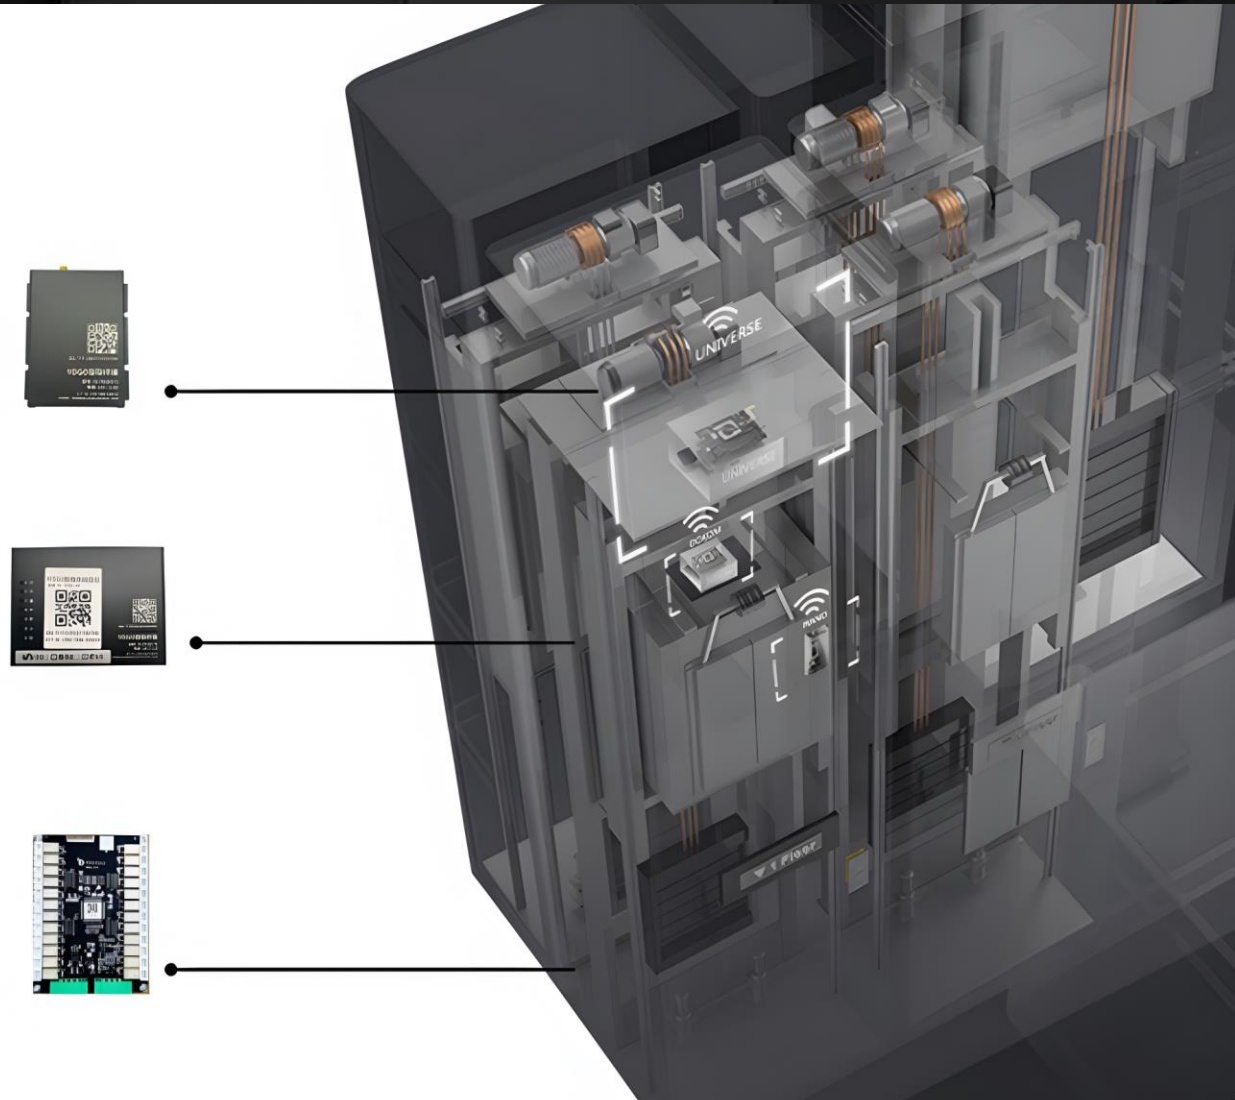

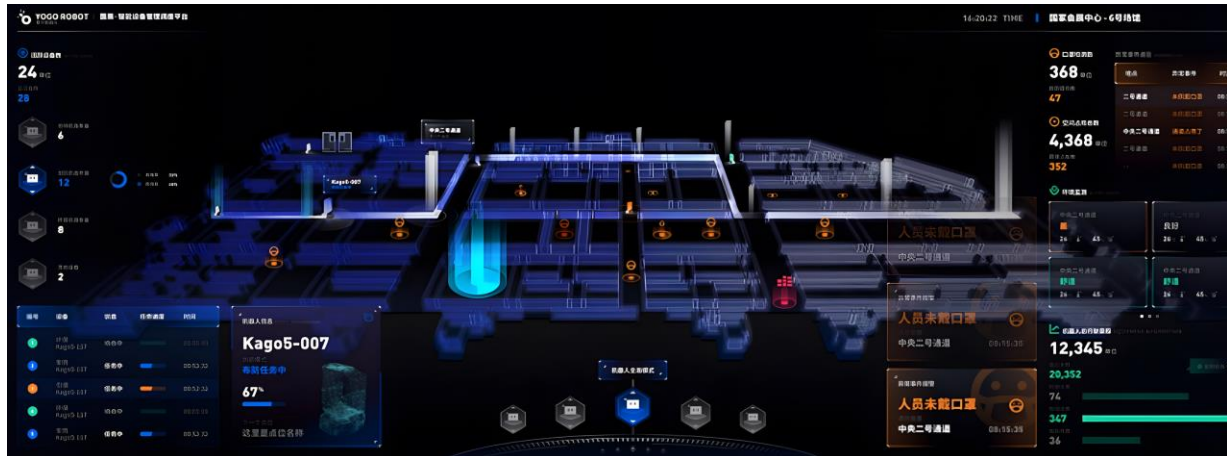

Reliable vigilance with a friendly look:

- Patrol common areas; from the lobby to the parking lot.
- Suspect detection and notification.
- Integrated communication with police or security offices.

AI Smart Buildings

Control every part of your hotel & make robots able to interact with your facilities.

Your Robot – Your brand

Robot "skin" can be customized to strengthen brand awareness and increase social media publicity.

ALLYBOT-C2

Zeally intelligent commercial robot

Automated back-of-house operations can help to reduce cost **up to 45%**

Robot help to improve and offer **consistent guest experiences.**

Centralize operations and command a seamless fleet of operations remotely.
